'the forthcoming celebrations of the tercentenary of the Authorized Version British court of the Bible naturally lead to a consideration of the immense literary influence of that version. Swift's dictum stands preeminent in this direction:

"If it were not for the Bible and Book of Common Prayer in the vulgar tongue we should hardly be able to understand anything that was written among us a hundred years ago. Those books being of course the Social Democratic party, perpetually read in churches have proved as well as the Conservative, the National a kind of standard for language, especially Liberal, the Progressive-Radical and the to the common people."

Add to this the testimony of Hazlitt, who also pointed to the sudden inundation of England by great literature in 1611. After referring to the greatness and simplicity of such stories as those of Joseph, try when the time come Rachel and Laban, Ruth and Boaz, the captivity and deliverance of Israel, he

MISSOURI MULES FOR AFRICA. Recent Shipment Said to Be the Finest Ever Landed There.

By the steamship Welsh Prince, which arrived in Cape Town the first week of February, says the Daily Consular and Trade Report, there came a shipment of American mules which, by those competent to know, are adjuged to be the finest mules yet landed in South Africa.

Bros. of Springs, who hold the contract for the supply of mules to the Johannes burg corporation. The shipment consist of 124 mules, all of which are 4 to 7 years age and stand 15 hands in height this being the stipulation made by the corporation, who further stipulated that they must all be bred in the State of Missouri which is in such high repute as a mule breeding country.

A representative of the South Arrican Neus had an opportunity of seeing the shipment, and he states that they are a magnificent lot and have stood the trip from America well. Seven days were required for their railway transportation to the American port, thirty days at sea, with three more days to Johannesburg. The passage across was not smooth, the vessel experiencing heavy weather, and for eighteen days the mules were standing almost knee deep in water.

On one occasion a heavy sea was shipped and portions of the raule boxes washed away. The captain of the vessel slowed the yessel down for three hours while the whole crew erected other boxes. On the whole voyage there was not a casualty and considering the time the mules had been on the journey they looked well and This is the second shipment that full time at school, to be employed for more than three and a half hours a day.
